

Spanish A1 — Session 21 Homework

Crescere | Beginner Spanish | Session 21

Complete before Session 22 | Estimated time: 25–30 minutes

Part 1 — Body Parts with Articles (5 min)

Write the correct definite article (*el, la, los, las*) for each body part. Do not look at your notes first — check after.

1. ____ cabeza
2. ____ espalda
3. ____ ojos (pl.)
4. ____ garganta
5. ____ pie
6. ____ mano ← careful, this one surprises students
7. ____ rodillas (pl.)
8. ____ estómago

Answer key:

1. la cabeza
2. la espalda
3. los ojos
4. la garganta
5. el pie
6. **la** mano (feminine despite ending in -o)
7. las rodillas
8. el estómago

If you wrote *el mano*: *la mano* is feminine — one of the notable exceptions in Spanish. Write *la mano* five times.

Part 2 — Doler: Duele or Duelen? (8 min)

Choose *me duele* or *me duelen* and complete the sentence. Add the correct article on the body part.

1. ____ ____ cabeza — *no puedo pensar.*
2. ____ ____ pies después de caminar mucho.
3. ____ ____ estómago — *no quiero comer.*
4. ____ ____ rodillas cuando hace frío.
5. ____ ____ garganta — *me cuesta tragar.*
6. ____ ____ ojos — *he trabajado demasiado.*

Answer key:

1. *Me duele la cabeza*
2. *Me duelen los pies*
3. *Me duele el estómago*
4. *Me duelen las rodillas*
5. *Me duele la garganta*

6. *Me duelen los ojos*

If you used *me duelo* anywhere: *doler* works like *gustar* — the body part is the subject, not you. *Me duele la cabeza* = la cabeza is what hurts.

Part 3 — Symptoms (5 min)

Match each symptom to the most natural Spanish phrase. Use each phrase once.

tengo fiebre / estoy resfriado/a / tengo mucha tos / estoy mareado/a / me siento muy mal

1. I sneeze constantly and my nose is running. →
2. I have 38.5 degrees of temperature. →
3. I've been coughing for three days. →
4. When I stand up, the room spins. →
5. I have no energy and everything aches. →

Answer key:

1. *Estoy resfriado/a*
 2. *Tengo fiebre*
 3. *Tengo mucha tos*
 4. *Estoy mareado/a*
 5. *Me siento muy mal*
-

Part 4 — Written Pharmacy Encounter (10 min)

Write a 6–8 line pharmacy conversation. You are the patient. Include:

- ☐ Enter and greet
- ☐ Say you don't feel well (*No me encuentro bien / Me siento mal*)
- ☐ Describe at least two symptoms — one using *doler*, one other symptom phrase
- ☐ Ask for a product (*¿Tiene algo para...? / Necesito algo para...*)
- ☐ Ask at least one follow-up question (*¿Necesita receta? / ¿Cuántas veces al día?*)
- ☐ Thank and close

Write the pharmacist's lines too — they only need to be 4–6 words each.

Example opening (continue from here):

Tú: Buenos días. No me encuentro bien... **Farmacéutico/a:** ¿Qué le pasa? **Tú:** ...

Part 5 — Speaking Practice (5 min out loud)

Read your pharmacy conversation aloud THREE times.

- First time: read from your notes
- Second time: glance at notes only for vocabulary
- Third time: say the patient's lines without notes

Aim: To produce your entry, symptom description, and request without hesitation on the key words.

Extension (Optional)

If you finish early:

- Write a second scenario where your symptoms are different: back pain + fatigue (no cold or fever). Practice the different body part and article.
- Try using *llevar* in your symptom description: *Llevo dos días con fiebre / Llevo una semana tosiendo*. You will work with *llevar* formally in Session 22 — preview it here if you can.
- Add a line where the pharmacist asks something unexpected: "*¿Es alérgico/a a algún medicamento?*" — write how you would respond.
